THEORETICAL AND MATHEMATICAL PHYSICS

Volumes 70-73, 1987

(A translation of Teoreticheskaya i Matematicheskaya Fizika)

Volume 70, Number 1 January, 1987

	Engl.	Russ.
The Relativistic Theory of Gravitation and New Notions of Space-Time — A. A. Logunov	1	3
Hidden Symmetry of the Landau-Lifshitz Equation, Hierarchy of Higher Equations, and the Dual Equation for an Asymmetric Chiral Field — P. I. Holod	11	18
Inverse Scattering Problem in a Class of Nonlocal Potentials. I — V. M. Muzafarov	20	30
Covariant Quantization in Models of Extended Objects — A. E. Dorokhov	35	52
Asymmetry of the Quark Spectrum and Effective Langrangian for Massive Pseudoscalar Mesons — A. A. Andrianov, V. A. Andrianov, V. Yu. Novozhilov, and Yu. V. Novozhilov	43	63
Bianchi Identities in Simple Supergravity — I. A. Bandos and V. G. Zima	52	76
Geometry of Two-Dimensional Superconformal Field Theories — M. A. Baranov, I. V. Frolov, and A. S. Shvarts	64	92
Trace Formula for Schrödinger Operator with Coulomb Potential in Three-Dimensional Space — A. A. Kvitsinskii	72	104
Influence of Relaxing Defects on the Dynamics of Virtual Domain Walls — V. L. Aksenov, A. Yu. Didyk, and R. Žakula	80	115
Phase Transitions in the O(N) Model with Several Coupling Constants — K. G. Klimenko	87	125
Critical Exponents in Completely Integrable Models of Quantum Statistical Physics — N. M. Bogolyubov, A. G. Izergin, and V. E. Korepin	94	135
Supersymmetric Quantum Mechanics and Rearrangement of the Spectra of Hamiltonians — V. N. Berezovoi and A. I. Pashnev	102	146
Study of the Shift of Two-Phonon Poles in Deformed Nuclei by the Method of Boson Expansions — R. V. Dzholos, S. P. Ivanova, R. Pedrosa, and V. G. Solov'ev	108	154

Volume 70, Number 2 February, 1987

Dynamics of Test Bodies in the Relativistic Theory of Gravitation — A. A. Logunov and Yu. M. Loskutov	113	163
Exterior Axisymmetric Solution for a Rotating Body in the Relativistic Theory of Gravitation — A. A. Vlasov and A. A. Logunov	118	171
Field Algebras in Quantum Theory with Indefinite Metric. III. Spectrum of Modular Operator and Tomita's Fundamental Theorem — K. Yu. Dadashyan and S. S. Khoruzhii	125	181
Anderson Localization in the Nondiscrete Maryland Model — V. A. Geiler and V. A. Margulis	133	192
Periodic Intermediate Long Wave Equation: the Undressing Method — D. R. Lebedev and A. O. Radul	140	202
Model of Dynamical Breaking of Chiral Symmetry and Quark Condensate — M. L. Nekrasov and V. E. Rochev	147	211
Higher Orders of Perturbation Theory in the Neighborhood of a Classical Solution — V. B. Tverskoi	152	218

General Representation of Physical Quantities in Scheme-Invariant Perturbation Theory and its Optimization — V. I. Vovk and S. I. Maksimov 158 226
Nonequilibrium Statistical Hydrodynamics of Ionic Systems — D. N. Zubarev and M. V. Tokarchuk 164 234
Covariant Formalism of Reductions of Superconformal Gauge Theories to Poincaré Supergravities — N. G. Pletnev and V. S. Serebryakov..... 179 255
Principal Singularities of the S Matrix for a System of One-Dimensional Particles — V. S. Buslaev and N. A. Kaliteevskii..... 187 266
Debye Screening in Spatially Inhomogeneous Systems of Charged Particles. II. Proof of Convergence of Cluster Expansions — A. I. Pilyavskii and A. L. Rebenko 195 278
Criteria of Separability of the Variables in the Dirac Equation in Gravitational Fields — I. E. Andrushkevich and G. V. Shishkin..... 204 289
Effective Lagrangian of $A^3(\nu\bar{\nu})$ Interaction and the $\gamma\gamma \to \gamma(\nu\bar{\nu})$ Process in the Two-Dimensional Approximation of Quantum Electrodynamics — Yu. M. Loskutov and V. V. Skobelev..... 215 303
Veselov–Novikov Equation as a Natural Two-Dimensional Generalization of the Korteweg–de Vries Equation — L. V. Bogdanov 219 309
Energy-Weighted Moments in Fragmentation Problems — V. A. Kuz'min..... 223 315

Volume 70, Number 3 March, 1987

Inverse Scattering Method with Variable Spectral Parameter — S. P. Burtsev, V. E. Zakharov, and A. V. Mikhailov..... 227 323
"Thirring × Liouville" Model — A. K. Pogrebkov and S. V. Talalov..... 241 342
Bound States of Solitons in Semi-Infinite Josephson Junctions with Microscopic Inhomogeneity — N. M. Atakishiev and M. S. Pomerants..... 247 351
Functional Formulation of Microscopic Theory of Exciton Polaritons — G. F. Glinskii and Zl. Koinov..... 252 358
Two-Loop Renormalization-Group Calculations in Theories with Scalar Quarks — S. G. Gorishnii, A. L. Kataev, and S. A. Larin..... 262 372
Oscillator with Singular Perturbation — V. B. Gostev, V. S. Mineev, and A. R. Frenkin 270 384
Generating Functionals for Green's Functions in Gauge Field Theories — M. Bordag, L. Kaschlun, V. A. Matveev, and D. Robaschik..... 278 394
Multiplicative Renormalization of Two-Dimensional Chiral Theories. II — A. V. Bratchikov and I. V. Tyutin..... 285 405
Investigation of Gauge Ambiguity by Means of the Theory of Harmonic Maps — M. Yu. Logachev..... 290 412
Spontaneous Reduction in Multidimensional (D = 10, 11) Supergravity Theories with Arbitrary Signature — I. Ya. Aref'eva, I. V. Volovich, and B. G. Dragović 297 422
Resonance Scattering in a Pair of Spaces — E. L. Korotyaev..... 304 432
Low-Temperature Properties of Quasione-Dimensional Magnetic Systems — M. E. Palistrant and I. V. Pédure..... 312 443
Dynamics of Superradiant Processes in Two-Level Macroscopic Systems in a Crystal — N. N. Bogolyubov (Jr), E. K. Bashkirov, Fam Le Kien, and A. S. Shumovskii 320 454
Low-Temperature Phase Transitions in Systems with One Ground State — E. A. Pecherskii and S. B. Shlosman..... 325 462
Semiclassical Method of Calculating the Characteristics of the Spontaneous Radiation of a Charge Moving in Periodic Structures — V. G. Bagrov and V. V. Belov 330 469
Model of Quadrupole Glass with Nonaxial Interaction — E. A. Luchinskaya and E. E. Tareeva 336 477

Volume 71, Number 1 April, 1987

Inverse Scattering Problem in a Class of Nonlocal Potentials. II. Coupled Partial Channels — V. M. Muzafarov..... 339 3
On Restricted N-Soliton Solutions of the Nonlinear Schrödinger Equation — V. A. Vysloukh and I. V. Cherednik..... 346 13

Particular Solutions of the Equations for the Lowest Green's Functions in the Infrared Region of Quantum Chromodynamics — B. A. Arbuzov and A. I. Davydychev 352 21
Integral Representations of the Schwinger Functions for Wick Polynomials in the Free Field — É. P. Osipov 359 31
Quantization of a d = 2 Anomalous Theory — S. L. Shatashvili 366 40
Internal Symmetry Algebra of Exactly Integrable Dynamical Systems in the Quantum Domain — A. N. Leznov and M. A. Mukhtarov 370 46
Infrared Asymptotic Behavior of Gauge-Invariant Propagator in Quantum Electrodynamics — N. B. Skachkov, I. L. Solovtsov, and O. Yu. Shevchenko 376 54
Hidden Symmetries of Kaluza-Klein Theories — A. D. Popov 385 67
Axial Anomalies in External Tensor Fields — L. A. Zurabyan, R. L. Mkrtchyan, and O. M. Khudaverdyan 393 78
Caustic Singularities in the Wave Function of the Relative Motion of Heavy Ions — V. I. Zagrebaev 402 91
Microscopic Theory of Nonstationary Tunnel Current in a Superconducting Junction — L. N. Akhramovich and A. V. Svidzinskii 409 101
Construction of Theory of a Binary Mixture of Nonideal Bose Gases (or Liquids) by the Method of Collective Variables. II. The s-Particle Density Matrices at T = 0. Variational Calculation of the Ground-State Energy and Density-Density Correlation Functions — G. O. Balabanyan 418 114
On the Theory of the Orientational Ordering of a Solid Orthohydrogen-Parahydrogen Mixture at Zero Temperature — M. I. Vladimir, S. P. Kozhukar', and V. A. Moskalenko 429 129
Solutions of Domain Type in Anisotropic Magnetic Chains — Ya. I. Granovskii and A. S. Zhedanov 438 143
Integration of the Stationary Problem for a Classical Spin Chain — A. P. Veselov 446 154

Volume 71, Number 2 May, 1987

Representations of the Algebra of "Parafermion Currents" of Spin 4/3 in Two-Dimensional Conformal Field Theory. Minimal Models and the Tricritical Potts Z_3 Model — A. B. Zamolodchikov and V. A. Fateev 451 163
Topological Charges in Field Theories with Broken Symmetry — A. G. Savinkov .. 463 179
Duality in d = 2 σ Models of Chiral Field with Anomaly — E. A. Ivanov 474 193
On the Irreducible Part of the Current Correlation Function in Quantum Completely Integrable Models — A. V. Zabrodin 485 208
Para-Grassmann Extension of the Neveu-Schwarz-Ramond Algebra — A. A. Zheltukhin 491 218
Hyper-Kähler Sigma Models in Extended Superspace — S. V. Ketov, B. B. Lokhvitskii, and I. V. Tyutin 496 226
Calculation of Static Interquark Potential in a String Model in a Timelike Gauge — V. V. Nesterenko 504 238
Properties of the Quadrupole Glass Phase in the Presence of an External Field Gradient — L. A. Dogotar', S. P. Kozhukar', and V. A. Moskalenko .. 512 249
Periodic Effective Potentials for Spin Systems and New Exact Solutions of the One-Dimensional Schrödinger Equation for the Energy Bands — O. B. Zaslavskii and V. V. Ul'yanov 520 260
Solutions of the Bethe Ansatz Equations for XXX Antiferromagnet of Arbitrary Spin in the Case of a Finite Number of Sites — L. V. Avdeev and B.-D. Dörfel 528 272
Influence of Lattice Dimensionality and Quantum Fluctuations on the Kinematic Interaction of Spin Waves — V. N. Krivoruchko 542 290
Investigation of the Diffusion of a Massive Particle in a One-Dimensional Ideal Gas — M. L. Khazin 549 299
Spontaneous Compactification of d = 11 Supergravity Due to Rarita-Schwinger Fields — A. D. Popov 553 304
Spin Glass in Three-Component Potts Model — A. V. Bakaev, A. N. Ermilov, and A. M. Kurbatov 555 308

Electron–Phonon Coupling Constant in a Single-Gap Conductor — E. D. Belokolos and I. M. Pershko 558 313
Tetrad Formalism in String Field Theory — I. Ya. Aref'eva and I. V. Volovich.. 562 318

Volume 71, Number 3 June, 1987

Difference Between Gravitational Collapse in the Relativistic Theory of Gravitation and in the General Theory of Relativity — A. A. Vlasov and A. A. Logunov..... 565 323
An Equation for Disentangling Time-Ordered Exponentials with Arbitrary Quadratic Generators — V. G. Budanov 570 331
p-Adic Space–Time and String Theory — I. V. Volovich..... 574 337
Solution of Quantum Gel'fand–Levitan–Marchenko Equations for the Sine–Gordon Model with $\gamma = \pi/\nu$ — F. A. Smirnov 577 341
Nonlinear Schrödinger Equation and the Bogolyubov–Whitham Method of Averaging — M. V. Pavlov..... 584 351
Hamiltonian Structure of "Thirring × Liouville" Model. Singular Solutions — S. V. Talalov..... 588 357
Simplest Soliton Solutions of the Equations of the Periodic Toda Chain of the Series A_k in the Formalism of the Scalar L–A Pair — A. N. Leznov 598 370
Dimesic Atoms in a Quark Model of Superconducting Type — M. K. Volkov..... 606 381
Spinor–Spinor Quasipotential in Quantum Electrodynamics — G. M. Desimirov..... 611 388
Fermionic String Model in Spaces of Lie Groups — A. P. Isaev..... 616 395
Thermodynamic Properties of 20-Vertex Models — V. E. Zubkus and É. É. Tornau.. 627 410
Mean Field Method in the Theory of Quadrupolar Glass with Axial Interaction of Infinite Range — M. I. Vladimir, S. P. Kozhukar', and V. A. Moskalenko..... 632 417
Phase Diagrams and Singularity at the Point of a Phase Transition of the First Kind in Lattice Gas Models — S. N. Isakov 638 426
Exactly Solvable Model of Phase Transitions — Yu. M. Ivanchenko, A. A. Lisyanskii, and A. É. Filippov..... 649 441
Asymptotic Completeness for a Particle–Fermi-Gas System — A. Sh. Domnenkov.... 656 451
Elementary Excitations in the Dimerized Hubbard Model — A. V. Vedyaev, M. E. Zhuravlev, and V. A. Ivanov 660 457
Nonlinear Dynamics of a System of Two-Level Molecules — A. A. Serikov 665 464

Volume 72, Number 1 July, 1987

Adjoint Representations of Exceptional Lie Algebras — M. A. Ol'shanetskii and V.-B. K. Rogov..... 679 3
Effective Lagrangian for Supersymmetric Quantum Chromodynamics and the Problem of Dynamical Breaking of Supersymmetry — V. K. Krivoshchekov, A. A. Slavnov, and L. O. Chekhov..... 686 12
Vector Generalization of a System of Equations of Interacting High-Frequency and Low-Frequency Waves — Yu. V. Katyshev, V. G. Makhan'kov, and R. Myrzakulov..... 693 22
Reductions and Exact Solutions of a Nonlinear Dirac Equation — V. I. Fushchich and V. M. Shtelen' 703 35
Covariant Evolution Operator in Composite Models of Quantum Field Theory — A. N. Kvinikhidze, V. A. Matveev, and A. M. Khvedelidze 710 45
Renormalization Group Equations and Effective Action in Curved Space–Time — I. L. Bukhbinder and Yu. Yu. Vol'fengaut..... 720 58
1/N Expansion in the Gross–Neveu Model with Arbitrary Number of Fermion Multiplets — K. G. Klimenko 727 68
Kinetic Part of Dynamical Torsion Theory — M. O. Katanaev 735 79
Compactification of Ten-Dimensional Kaluza–Klein Model and Superstring — D. V. Vasilevich 742 89
Scattering Theory for Supersymmetric Hamiltonian and Supersymmetry of Nuclear Interactions — A. A. Andrianov, N. V. Borisov, and M. V. Ioffe.. 748 97
Odd Bases of Lie Superalgebras and Integrable Equations — V. A. Andreev..... 758 112
Scattering for the Schrödinger Operator in the Case of a Crystal Film — Yu. P. Chuburin..... 764 120

Method of Reduced Description of Coherent Radiation — A. A. Bakasov and V. I. Yukalov 773 132
Fluctuation-Induced Phase Transition of the First Kind in an Exactly Solvable Model — Yu. M. Ivanchenko, A. A. Lisyanskii, and A. É. Filippov . 786 149
On the Two-Dimensional Zakharov–Shabat Problem — L. V. Bogdanov..... 790 155

Volume 72, Number 2 August, 1987

Equations of Gas Dynamics Admitting an Infinite Number of Symmetries — A. G. Meshkov and B. B. Mikhalyaev..... 795 163
Some Exact Solutions of a System of Nonlinear Schrödinger Equations in Three-Dimensional Space — S. S. Moskalyuk..... 801 172
Exact First-Order Solutions of the Nonlinear Schrödinger Equation — N. N. Akhmediev, V. M. Eleonskii, and N. E. Kulagin..... 809 183
Exact Solution of a Quasipotential Equation by Contour Integration — É. É. Boos, V. I. Savrin, and E. M. Shablygin..... 819 197
Canonical Quantization of Theories with Higher Derivatives. Quantization of R^2 Gravitation — I. L. Bukhbinder and S. L. Lyakhovich..... 824 204
Effective Hamiltonian Method and Spectrum of a Two-Electron Atom — A. A. Belov and V. L. Pokrovskii..... 835 219
Adiabatic Formalism and Semiclassical Approximation for Discrete Levels — A. N. Vasil'ev and M. A. Guzev..... 842 229
Maxwell–Lagrange System in the Theory of Optical and Magnetic Resonances — E. I. Bogdanov..... 853 244
Hamiltonian of the Phase Separation Border and Phase Transitions of the First Kind. II. The Simplest Disordered Phases — A. G. Basuev..... 861 255
Equation of State in an Exactly Solvable Model of a Structural Phase Transition — N. M. Plakida and N. S. Tonchev..... 872 269
Finite-Temperature Correlation Functions of Heisenberg Antiferromagnet — A. G. Izergin, V. E. Korepin, and N. A. Slavnov..... 878 277
Coherent Spontaneous Radiation of Frenkel Excitons — S. N. Andrianov, V. V. Samartsev, and Yu. E. Sheibut..... 884 286
Solutions of the Kinetic Equation for a Collisionless Plasma in an External Electromagnetic Field — V. N. Komarov and S. A. Smolyanskii 892 296
Korteweg–de Vries Superequation Related to the Lie Superalgebra of Neveu–Schwarz-2 String Theory — T. G. Khovanova 899 306
Nonlocal Evolution Equations Associated with the Zakharov–Shabat Spectral Problem — B. A. Magadeev..... 904 313

Volume 72, Number 3 September, 1987

Expansions with Respect to Squares, Symplectic and Poisson Structures Associated with the Sturm–Liouville Problem. I. — V. A. Arkad'ev, A. K. Pogrebkov, and M. K. Polivanov..... 909 323
Field Algebras in Quantum Theory with Indefinite Metric. IV — K. Yu. Dadashyan and S. S. Khoruzhii..... 921 340
Qualitative Analysis and Calculations of Finite-Gap Solutions of the Korteweg–de Vries Equation. Automorphic Approach — A. I. Bobenko and D. A. Kubenskii..... 929 352
Quantization of a Soliton Solution in a (3 + 1)-Dimensional Model of a Scalar Field with Self-Interaction Involving Derivatives — K. A. Sveshnikov and V. B. Tverskoi..... 935 361
Turbulent Dynamo as Spontaneous Symmetry Breaking — L. Ts. Adzhemyan, A. N. Vasil'ev, and M. Gnatich..... 940 369
Quantization of Yang–Mills Field in Gauge with $A_0 = 0$ — N. V. Antonov..... 951 384
Relationship Between a Quasipotential Equation and a Schrödinger Equation — M. A. Braun..... 958 394
Electron in a Homogeneous Crystal of Point Atoms with Internal Structure. I — B. S. Pavlov..... 964 403
Rigid Single-Electron Model of a Long Molecule — A. V. Strepetov..... 973 416
Quantum String Theory in Four-Dimensional Space–Time — G. P. Pron'ko..... 978 424

Kinetics of Two-Photon Superradiance in the Case of Damped Polarization — A. A. Bakasov, N. N. Bogolyubov (Jr.), A. S. Shumovskii, and V. I. Yukalov..... 987 436
Phase Transitions in Two-Component Spatially Homogeneous Systems. I. Gaussian Approximation of the Partition Function — O. V. Patsagin and I. R. Yukhnovskii..... 998 452
On the Theory of Multicomponent Disordered Magnets — I. A. Vakarchuk and I. F. Margolych..... 1006 462
Vlasov Limit of Correlation Functions of the Grand Canonical Ensemble — A. A. Arsen'ev..... 1016 477

Volume 73, Number 1 October, 1987

Geometry of Classical Mechanics with Non-Abelian Gauge Symmetry — M. A. Solov'ev..... 1019 3
Quantum Description of Dirac–Kähler Field — I. A. Satikov and V. I. Strazhev..... 1028 16
Quantum R Matrices and Matrix Generalizations of Trigonometric Functions — V. V. Bazhanov..... 1035 26
Investigation of Equations for Coefficient Functions of the Yang–Mills Field and their Solutions — Wang Xifu and Xue Kang..... 1040 33
Integrable Model of Yang–Mills Theory with Scalar Field and Quasi-Instantons — V. A. Yatsun..... 1050 47
Instanton Effects in Two-Dimensional Scalar Electrodynamics — A. N. Korotkov and V. F. Tokarev..... 1060 61
Octonion and Superoctonion Symmetries in Exceptional Gauge Groups — D. V. Yur'ev..... 1069 74
Convolution of the Secular Equation of Perturbation Theory for a Degenerate Case — R. Kh. Sabirov..... 1072 79
Projection Operator Method in the Theory of Disordered Systems. I. Spectra of Quasiparticles — V. F. Los'..... 1076 85
Conformal Symmetry in Two-Dimensional Space: Recursion Representation of Conformal Block — Al. B. Zamolodchikov..... 1088 103
Phase Transitions in Quantum Models of Rotators and Ferroelectrics — L. A. Pastur and B. A. Khoruzhenko..... 1094 111
Convergence to a Stationary State for One-Dimensional Lattice Quantum Models of Hard Rods — Yu. M. Sukhov and A. G. Shukhov..... 1104 125
Derrida Model for Arbitrary Spin — D. B. Saakyan..... 1115 141
Scattering Theory in the Massless Lee Model — P. P. Kulish and M. A. Sokolov..... 1121 149
Mass of Newtonian Stars in the Relativistic Theory of Gravitation and in General Relativity — A. A. Vlasov..... 1124 154

Volume 73, Number 2 November, 1987

Relativistic Theory of Gravitation and Criticism of General Relativity — A. A. Logunov, Yu. M. Loskutov, and M. A. Mestvirishvili..... 1131 163
Derivation of Anomalous Commutator in the Functional Integral Formalism — A. Yu. Alekseev, Ya. Madaichik, L. D. Faddeev, and S. L. Shatashvili. 1149 187
Auxiliary Fields in Extended Supersymmetry — Nguyen Van Hieu and Nguyen Hung Shon..... 1152 191
Propagator of Yang–Mills Field in Light-Cone Gauge — A. A. Slavnov and S. A. Frolov..... 1158 199
Geometry of the Orbit Space and Phases of ^{3}He and a Neutron Star in the P State — F. A. Bogomolov and M. I. Monastyrskii..... 1165 210
Instanton Gas in Collective Variables — V. F. Tokarev..... 1175 223
Nonlocal Gauge Theories — N. V. Krasnikov..... 1184 235
Nonconservation of Fermion Quantum Numbers in the Case of Tunneling Transitions in Gauge Theories — G. V. Lavrelashvili..... 1191 245
Solution of the Benney Equations by the Inverse Scattering Method — V. V. Geogdzhaev..... 1198 255

Liquid–Gas Critical Point in the Method of Collective Variables — I. M. Idzik, V. A. Kolomiets, and I. R. Yukhnovskii..... 1204 264
Stationary Regime for the Quantum Dynamics of Particles in a Randomly Varying Potential — Yu. N. Barabanenkov..... 1217 281
Relativistic System of Interacting Points as a Discrete String — V. D. Gershun and A. I. Pashnev..... 1227 294
Equivalence of Four-Dimensional Self-Duality Equations and the Continuum Analog of the Principal Chiral Field Problem — A. N. Leznov..... 1233 302
Bosonization of the Conformal Anomaly and Induced Gravity — D. V. Vasilevich and Yu. V. Novozhilov..... 1237 308
Representation of Symmetry Group Transformation Operators in the Interaction Picture — G. P. Dzhordzhadze, A. N. Kvinikhidze, and A. M. Khvedelidze..... 1239 311
Hamiltonian Formalism of Weakly Nonlinear Hydrodynamic Systems — M. V. Pavlov..... 1242 316

Volume 73, Number 3 December, 1987

Some Gibbs Aspects of the Sine–Gordon Transformation — R. Gielerak..... 1247 323
Semiclassical Quantization of Kowalewski Top — I. V. Komarov and V. B. Kuznetsov..... 1255 335
Uniqueness Method: Multiloop Calculations in QCD — D. I. Kazakov and A. V. Kotikov..... 1264 348
Anomalies in Spaces of Even and Odd Dimensions in the Scheme of Stochastic Quantization — Éd. Sh. Egoryan, É. R. Nissimov, and S. Pacheva..... 1274 362
Calculation of Quantum Corrections to Nontrivial Classical Solutions by Means of the Zeta Function — R. V. Konoplich..... 1286 379
Effects Due to Finite Values of the Temperature and the Chemical Potential in Some Two-Dimensional Field Models — V. A. Osipov and V. K. Fedyanin..... 1296 393
Trigonometric Solutions of Triangle Equations. Simple Lie Superalgebras — V. V. Bazhanov and A. G. Shadrikov..... 1302 402
Superanalysis: Theory of Generalized Functions and Pseudodifferential Operators — A. Yu. Khrennikov..... 1313 420
Adiabatic Perturbation of Periodic Potential. II — V. S. Buslaev and L. A. Dmitrieva..... 1320 430
Description of Multiparticle Scattering by a Projection Method — V. I. Kukulin and V. N. Pomerantsev..... 1329 443
Localized Spin-Polaron States in Ferromagnets — V. V. Dyakin and B. M. Letfulov..... 1337 454
Microscopic Description of Bond Orientational Order in Simple Liquids — V. N. Ryzhov and E. E. Tareeva..... 1344 463
Spectral Analysis of Generators of Representations of the Group U(3) — A. V. Rozenblyum..... 1352 475
